OBJECTIVE

Results-driven Java Developer with expertise in Spring Boot, Microservices architecture, and scalable RESTful web services. Proven track record in driving best practices across development, testing, and CI/CD deployment on AWS and containerized environments. Seeking to leverage strong architectural decision-making, technical mentoring, and problem-solving skills at HCLTech.

EDUCATION

B.Tech – Computer Science Engineering, GIET University, Odisha 2021 – 2025
CGPA: 8.3

Intermediate (PCM + IT), Vedic Junior College, Sambalpur 2018 – 2020
Percentage: 74%

SKILLS

Programming Languages: Java, SQL, Python, C

Backend & Frameworks: Java/J2EE, Spring Boot (Microservices, Spring Security, JPA), RESTful Web Services

Databases: MySQL, PostgreSQL, Redis, MongoDB, DynamoDB

DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), AWS (EC2, RDS, S3), Linux, Nginx, PM2

API & Architecture: Microservices Architecture, REST APIs, System Design, High Availability, Swagger (OpenAPI), WebSocket

Developer Tools: Postman, JIRA, Draw.io, GitHub Copilot (AI Agent)

EXPERIENCE

Associate Software Engineer – Tech Mahindra Mar 2026 – present

- Led the design, development, and deployment of scalable RESTful web services using Java and Spring Boot framework, achieving high system availability.
- Collaborated with cross-functional teams in an Agile environment to gather technical requirements and drive key microservices architectural decisions.
- Enforced strict best practices for coding, unit testing, and deployment while conducting comprehensive code reviews and mentoring junior team members.
- Integrated Docker containerization and automated CI/CD pipelines (GitHub Actions) to optimize build and release cycles on AWS infrastructure.
- Troubleshoot critical technical issues and optimized database queries in PostgreSQL/MySQL to improve application performance and response latency.

Backend Developer – eMediHub Platform, AscendSoft Pte Ltd May 2025 – Mar 2026

- Architected secure backend microservices for the eMediHub platform using Spring Boot, Spring Security, and JPA.
- Designed and documented RESTful APIs with Swagger (OpenAPI) to enable seamless integration across multi-tier application components.
- Implemented distributed caching and query optimization strategies using Redis and MySQL, significantly reducing server overhead.
- Configured and managed cloud deployments on AWS (EC2, RDS, S3) with automated CI/CD workflows and container management.
- Communicated complex technical concepts to stakeholders, presenting architecture roadmaps and recommending innovative backend solutions.

PROJECTS

- Dress-Craft:** Developed a scalable e-commerce backend using Java, Spring Boot microservices, and PostgreSQL, containerized with Docker and deployed via CI/CD pipelines.
- Shrujan 3.0:** Engineered secure RESTful web services with Spring Security, leveraging Redis caching and MySQL for high-concurrency performance.
- AVYAKT 3.0:** Architected backend real-time event microservices on AWS utilizing Spring Boot, WebSockets, and automated GitHub Actions workflows.

CERTIFICATIONS

Claude Code 101 (Tech Mahindra, Apr 2026) **JAVA Certification** (WIPRO, Apr 2024)

Android Development (Avyakt 3.0, Oct 2023) **MuleSoft Certification** (Aug 2023)
