OBJECTIVE

Results-driven Java & Spring Boot Developer with strong hands-on expertise in Functional Programming, Microservices architecture, and cloud deployment. Adept at building scalable event-driven backends, writing clean testable code, and implementing modern cloud-native patterns. Seeking to leverage technical skills to deliver high-performance enterprise solutions for IntraEdge.

EDUCATION

B.Tech – Computer Science Engineering, GIET University, Odisha 2021 – 2025
CGPA: 8.3

Intermediate (PCM + IT), Vedic Junior College, Sambalpur 2018 – 2020
Percentage: 74%

SKILLS

Programming Languages: Java (Java 17/21, Streams, Lambdas), Python, C, SQL

Backend & Frameworks: Spring Boot (Microservices, Spring Security, Spring Data JPA), Functional Java, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis

DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), AWS (EC2, RDS, S3), GCP (Cloud Run, GKE), Linux, Nginx

API & Architecture: REST APIs, System Design, Microservices (Choreography, Strangler, Sidecar), Event-Driven Architecture (Kafka), WebSockets, OpenAPI/Swagger

Developer Tools: Postman, JIRA, Draw.io, GitHub Copilot (AI Agent)

EXPERIENCE

Associate Software Engineer – Tech Mahindra Mar 2026 – present

- Architected and optimized scalable Java microservices using Spring Boot, leveraging modern functional programming features (Streams, Lambdas, Functional Interfaces) for maximum efficiency.
- Implemented event-driven design patterns and choreography-based asynchronous messaging to support distributed enterprise backend systems.
- Engineered automated CI/CD pipelines using GitHub Actions and Docker containers for deployment across public cloud infrastructure (AWS/GCP).
- Applied Strangler and Sidecar microservice architectural patterns to incrementally modernize core backend services without operational downtime.
- Enforced clean code practices, pure functions, and immutable data structures while driving continuous code quality and unit testing coverage.

Backend Developer – eMediHub Platform, AscendSoft Pte Ltd May 2025 – Mar 2026

- Designed and deployed secure RESTful microservices for healthcare management platforms utilizing Java, Spring Boot, and JPA/Hibernate.
- Optimized complex PostgreSQL and MySQL relational database queries, introducing indexing and caching mechanisms to reduce API response latency.
- Containerized multi-tier backend services with Docker, enabling seamless automated deployments to cloud environments.
- Secured cloud API endpoints by implementing Spring Security and JWT authentication, ensuring strict adherence to compliance standards.
- Collaborated with cross-functional teams to migrate legacy monolithic components into scalable, event-aware microservices.

PROJECTS

- Dress-Craft:** Developed a high-performance e-commerce backend using Java, Spring Boot, and PostgreSQL, featuring secure payment integration and modular REST APIs.
- Shrujan 3.0:** Built a scalable, containerized event portal backend with Node.js, Docker, and MySQL, automated via CI/CD deployment pipelines.
- AVYAKT 3.0:** Engineered real-time notification and data distribution backend services leveraging Spring Boot WebSockets and cloud hosting platforms.

CERTIFICATIONS

Claude Code 101 (Tech Mahindra, Apr 2026) **JAVA Certification** (WIPRO, Apr 2024)

Android Development (Avyakt 3.0, Oct 2023) **MuleSoft Certification** (Aug 2023)
