## OBJECTIVE

Results-driven Backend Developer with hands-on expertise in building high-availability microservices, robust REST APIs, and scalable cloud infrastructure. Proficient in Java, Spring Boot, SQL/NoSQL databases, Docker containerization, and AWS automated CI/CD pipelines. Eager to leverage backend architecture and optimization skills at ANH Engineering Services to deliver reliable enterprise solutions.

## EDUCATION

**B.Tech – Computer Science Engineering, GIET University, Odisha** 2021 – 2025  
CGPA: 8.3

**Intermediate (PCM + IT), Vedic Junior College, Sambalpur** 2018 – 2020  
Percentage: 74%

## SKILLS

**Programming Languages:** Java, Python, SQL, C

**Backend & Frameworks:** Spring Boot (Microservices, Spring Security, Data JPA), RESTful Web Services, Node.js, Express.js

**Databases:** MySQL, PostgreSQL, MongoDB, Redis, DynamoDB

**DevOps & Cloud:** Docker, Docker Compose, CI/CD (GitHub Actions), AWS (EC2, RDS, S3), Linux, Nginx, PM2

**API & Architecture:** Microservices Architecture, System Design, REST APIs, Distributed Caching, Swagger (OpenAPI), WebSockets

**Developer Tools:** Postman, JIRA, Draw.io, GitHub Copilot (AI Agent)

## EXPERIENCE

**Associate Software Engineer – Tech Mahindra** Mar 2026 – present

- Architected and deployed highly scalable, distributed microservices using Java and Spring Boot, enhancing system uptime and reliability.
- Engineered optimized RESTful APIs and integrated distributed caching via Redis, reducing latency by 35% for high-throughput endpoints.
- Containerized backend service stacks using Docker and Docker Compose, standardizing deployment across staging and production environments.
- Streamlined deployment processes by implementing automated CI/CD pipelines using GitHub Actions and AWS EC2/RDS instances.
- Collaborated with cross-functional teams to enforce microservice security standards using OAuth2 and Spring Security protocols.

**Backend Developer – eMediHub Platform, AscendSoft Pte Ltd** May 2025 – Mar 2026

- Developed end-to-end backend services for the eMediHub healthcare platform using Spring Boot, PostgreSQL, and REST API standards.
- Optimized complex MySQL and PostgreSQL database queries, indexing, and schemas, improving query execution time by 40%.
- Implemented secure user authentication and authorization modules using JSON Web Tokens (JWT) and Spring Security.
- Integrated third-party APIs and real-time data synchronization utilizing WebSockets and asynchronous messaging queues.
- Authored comprehensive API documentation using Swagger (OpenAPI) to accelerate frontend-backend integration cycles.

## PROJECTS

- Dress-Craft:** Designed a scalable e-commerce backend utilizing Spring Boot, MySQL, and Docker to seamlessly manage inventory, cart state, and order processing workflows.
- Shrujan 3.0:** Developed a centralized event management backend API with automated registration workflows and Redis-backed session management.
- AVYAKT 3.0:** Built real-time backend notification and data aggregation pipelines leveraging REST APIs, WebSockets, and AWS cloud hosting.

## CERTIFICATIONS

**Claude Code 101** (Tech Mahindra, Apr 2026)

**Android Development** (Avyakt 3.0, Oct 2023)

**JAVA Certification** (WIPRO, Apr 2024)

**MuleSoft Certification** (Aug 2023)
