OBJECTIVE

Results-driven Backend DevOps Engineer with expertise in Java, Spring Boot microservices, containerization with Docker, and AWS cloud infrastructure. Proven track record of optimizing backend performance, automating CI/CD pipelines, and driving operational efficiency with Prometheus and Grafana monitoring. Eager to leverage scalable system architecture skills to build resilient, high-availability backend systems at Atlassian.

EDUCATION

B.Tech – Computer Science Engineering, GIET University, Odisha 2021 – 2025
CGPA: 8.3

Intermediate (PCM + IT), Vedic Junior College, Sambalpur 2018 – 2020
Percentage: 74%

SKILLS

Programming Languages: Java, Python, C, SQL

Backend & Frameworks: Spring Boot (Microservices, Spring Security, JPA), RESTful APIs, Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis

DevOps & Cloud: Docker, Docker Compose, Kubernetes, AWS (EC2, RDS, S3), CI/CD (GitHub Actions), Prometheus, Grafana, Linux, Nginx, PM2

API & Architecture: REST APIs, Microservices Architecture, Distributed Systems, System Design, Swagger (OpenAPI), WebSocket

Developer Tools: Postman, JIRA, Draw.io, GitHub Copilot (AI Agent)

EXPERIENCE

Associate Software Engineer – Tech Mahindra Mar 2026 – present

- Architected and deployed high-performance Java Spring Boot microservices on AWS (EC2, RDS, S3), ensuring high availability and low-latency API execution.
- Containerized cloud-native microservices using Docker and structured Kubernetes configurations to streamline application scalability and orchestration.
- Designed and maintained automated CI/CD pipelines using GitHub Actions, cutting release cycles by 40% while embedding continuous automated testing.
- Configured system observability and monitoring dashboards using Prometheus and Grafana to track real-time CPU, memory, and API latency metrics.
- Optimized PostgreSQL and MySQL database query executions and connection pooling, boosting system throughput and reducing query response times by 30%.

Backend Developer – eMediHub Platform, AscendSoft Pte Ltd May 2025 – Mar 2026

- Engineered scalable Spring Boot REST APIs for healthcare platform workflows, handling thousands of daily transactions securely and efficiently.
- Utilized Docker and Docker Compose to containerize multi-tier microservice backend architectures for seamless local development and cloud integration.
- Enforced fine-grained access control and end-to-end payload security across microservices using Spring Security and JWT authentication.
- Automated cloud deployments to AWS EC2 and RDS environments, decreasing infrastructure configuration overhead by 35%.
- Established system logging and health-check monitoring procedures to proactively isolate bottlenecks and guarantee 99.9% uptime.

PROJECTS

- Dress-Craft:** Developed scalable Java Spring Boot microservices containerized with Docker, deployed onto AWS using automated GitHub Actions CI/CD workflows.
- Shrujan 3.0:** Engineered high-concurrency RESTful APIs utilizing Java, Spring Boot, and PostgreSQL, leveraging Docker for localized testing and AWS S3 for object storage.
- AVYAKT 3.0:** Designed a real-time microservices backend platform utilizing Java, Spring Boot, WebSockets, and Linux deployment scripts with automated operational monitoring.

CERTIFICATIONS

Claude Code 101 (Tech Mahindra, Apr 2026)

JAVA Certification (WIPRO, Apr 2024)

Android Development (Avyakt 3.0, Oct 2023)

MuleSoft Certification (Aug 2023)
