OBJECTIVE

Results-driven Backend Developer with 2+ years of experience engineering high-availability microservices using Java, Spring Boot, and RESTful APIs. Proficient in cloud deployments with AWS, Docker, and CI/CD pipelines alongside database tuning in MySQL and PostgreSQL. Eager to drive scalable backend architecture and system optimization for Damacloid Technologies.

EDUCATION

B.Tech – Computer Science Engineering, GIET University, Odisha 2021 – 2025
CGPA: 8.3

Intermediate (PCM + IT), Vedic Junior College, Sambalpur 2018 – 2020
Percentage: 74%

SKILLS

Programming Languages: Java, Python, C, SQL

Backend & Frameworks: Spring Boot (Microservices, Spring Security, JPA), Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis

DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), AWS (EC2, RDS, S3), Linux, PM2, Nginx

API & Architecture: REST APIs, System Design, Swagger (OpenAPI), WebSocket, Microservices

Developer Tools: Postman, JIRA, Draw.io, GitHub Copilot (AI Agent)

EXPERIENCE

Associate Software Engineer – Tech Mahindra Mar 2026 – present

- Architected and deployed high-performance microservices using Java, Spring Boot, and REST APIs to drive backend scalability.
- Implemented distributed caching strategies using Redis and optimized MySQL/PostgreSQL queries, reducing API latency by 25%.
- Containerized application services using Docker and configured automated CI/CD pipelines via GitHub Actions for seamless AWS deployments.
- Configured Spring Security and JWT authentication mechanisms to safeguard sensitive backend endpoints and microservice transactions.
- Engineered distributed backend workflows targeting high availability, fault tolerance, and peak concurrency operational requirements.

Backend Developer – eMediHub Platform, AscendSoft Pte Ltd May 2025 – Mar 2026

- Engineered RESTful backend APIs and microservices using Spring Boot and Node.js for high-volume healthcare processing.
- Designed relational database models in PostgreSQL and MySQL, optimizing complex queries and indexing to improve response times by 30%.
- Streamlined environment provisioning using Docker Compose, Nginx reverse proxying, and AWS EC2/S3 containerized deployments.
- Published OpenAPI/Swagger API documentation to maintain clear interface contracts and facilitate seamless front-end integration.
- Participated in code reviews, automated unit testing, and backend performance profiling to maintain 99.9% service uptime.

PROJECTS

- Dress-Craft:** Developed a scalable e-commerce backend leveraging Java, Spring Boot, MySQL, and Docker for secure online order processing.
- Shrujan 3.0:** Engineered a real-time event platform backend utilizing Node.js, WebSockets, and Redis caching for low-latency messaging.
- AVYAKT 3.0:** Built a microservices system architecture automated with GitHub Actions CI/CD and hosted on AWS EC2/S3 infrastructure.

CERTIFICATIONS

Claude Code 101 (Tech Mahindra, Apr 2026) **JAVA Certification** (WIPRO, Apr 2024)

Android Development (Avyakt 3.0, Oct 2023) **MuleSoft Certification** (Aug 2023)
