OBJECTIVE

Results-driven Backend Developer with hands-on expertise in building scalable, RESTful JSON-based APIs using Java and Spring Boot. Proven track record of optimizing PostgreSQL database performance, designing resilient microservices, and deploying containerized applications via AWS and Docker. Eager to leverage strong API design, CI/CD automation, and high-availability backend engineering skills at Forward Eye Technologies.

EDUCATION

B.Tech – Computer Science Engineering, GIET University, Odisha 2021 – 2025
CGPA: 8.3

Intermediate (PCM + IT), Vedic Junior College, Sambalpur 2018 – 2020
Percentage: 74%

SKILLS

Programming Languages: Java, SQL, Python, C

Backend & Frameworks: Spring Boot (Microservices, Spring Security, Spring Data JPA), Node.js, Express.js, RESTful JSON APIs

Databases: PostgreSQL, MySQL, Redis, MongoDB, DynamoDB

DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), AWS (EC2, RDS, S3), Linux, PM2, Nginx

API & Architecture: REST APIs, System Design, Microservices, Swagger (OpenAPI), Distributed Caching, WebSocket

Developer Tools: Postman, JIRA, Draw.io, GitHub Copilot (AI Agent)

EXPERIENCE

Associate Software Engineer – Tech Mahindra Mar 2026 – present

- Architected and deployed enterprise-grade RESTful JSON-based APIs using Java and Spring Boot, boosting backend data throughput and service reliability.
- Engineered scalable PostgreSQL and MySQL database solutions, optimizing complex SQL queries and indexing strategies to reduce response latency.
- Integrated Spring Data JPA and Hibernate for seamless data persistence, maintaining strict transactional integrity across distributed microservices.
- Containerized Spring Boot applications with Docker and automated deployment pipelines using GitHub Actions CI/CD to AWS EC2 and RDS.
- Implemented robust API security using Spring Security and JWT, protecting core endpoints and managing distributed access controls.

Backend Developer – eMediHub Platform, AscendSoft Pte Ltd May 2025 – Mar 2026

- Developed high-concurrency microservices and RESTful JSON APIs using Java and Spring Boot for core backend healthcare operations.
- Designed efficient relational database schemas in PostgreSQL, utilizing query tuning and indexing to handle high-volume transactions.
- Implemented distributed caching strategies using Redis to offload heavy PostgreSQL database reads and improve overall API performance.
- Created clear, interactive API documentation using Swagger/OpenAPI, simplifying integration for cross-functional teams.
- Managed continuous deployment and container orchestration across AWS and Linux environments to maintain system availability and performance.

PROJECTS

- Dress-Craft:** Developed a robust e-commerce backend platform utilizing Java, Spring Boot, and PostgreSQL to manage transactional workflows and REST API endpoints.
- Shrujan 3.0:** Built scalable Spring Boot microservices integrated with MySQL and Docker containerization to enable seamless cloud deployment and high availability.
- AVYAKT 3.0:** Architected secure RESTful APIs using Java and AWS services, optimizing database querying and system responsiveness for concurrent requests.

CERTIFICATIONS

Claude Code 101 (Tech Mahindra, Apr 2026)

JAVA Certification (WIPRO, Apr 2024)

Android Development (Avyakt 3.0, Oct 2023)

MuleSoft Certification (Aug 2023)
