OBJECTIVE

Results-driven Backend Developer specializing in the Java/Spring Boot ecosystem with robust DevOps expertise. Proven track record of architecting scalable microservices, developing secure RESTful APIs, and orchestrating containerized deployments using Docker and CI/CD pipelines. Adept at driving server-side performance and establishing resilient infrastructure on AWS for high-availability production environments.

EDUCATION

B.Tech – Computer Science Engineering, GIET University, Odisha 2021 – 2025
CGPA: 8.3

Intermediate (PCM + IT), Vedic Junior College, Sambalpur 2018 – 2020
Percentage: 74%

SKILLS

Programming Languages: Java, Python, C, SQL

Backend & Frameworks: Spring Boot (Microservices, Spring Security, JPA), Node.js, Express.js

Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis

DevOps & Cloud: Docker, Docker Compose, CI/CD (GitHub Actions), AWS (EC2, RDS, S3), Linux, PM2, Nginx

API & Architecture: REST APIs, System Design, Swagger (OpenAPI), WebSocket, Payment Gateways, Microservices

Developer Tools: Postman, JIRA, Draw.io, GitHub Copilot (AI Agent)

EXPERIENCE

Associate Software Engineer – Tech Mahindra Mar 2026 – present

- Designed and implemented a module-based backend architecture in Spring Boot, containerizing the application with **Docker** to ensure consistent deployments across environments and drastically improve maintainability.
- Engineered MVC-compliant Controller-Service-DAO layers, increasing code modularity and reducing maintenance effort by 30%.
- Architected optimized MySQL database schemas with Hibernate/JPA (ORM), and developed RESTful APIs achieving 95% functional test coverage.
- Implemented centralized API-level exception handling and input validation, resolving data integrity issues and reducing runtime errors by 35%.
- Managed Agile sprint workflows utilizing **JIRA** and **GitHub Issues**, executing task decomposition and streamlining code integration by raising **Pull Requests (PRs)** to ensure 100% on-time delivery.

Backend Developer – eMediHub Platform, AscendSoft Pte Ltd May 2025 – Mar 2026

- Architected robust backend services for the Virtual Doctor Consultation (VDC) workflows and Patient Dashboard using Node.js and Spring Boot, reducing data retrieval latency by 30%.
- Developed a structured architectural flow for medical consultation booking, engineering the backend payment initiation and gateway verification pipelines to ensure zero-fault transactions.
- Orchestrated containerized environments using Docker Compose and managed server-side process monitoring via PM2, achieving 99.9% uptime across AWS and DigitalOcean deployments.
- Integrated Agora real-time engagement SDK on the server-side to manage secure video consultation rooms and rejoin flows, delivering highly reliable sessions with 99.5% uptime.
- Authored comprehensive Low-Level Design (LLD) documentation for database schemas and API contracts, accelerating cross-functional handoffs by 20%.

PROJECTS

- Dress-Craft (E-commerce Core):** Engineered a robust Spring Boot backend architecture capable of supporting 5,000+ active sessions, focusing on secure REST APIs, authentication, and structured data persistence.
- Shrujan 3.0 (Fest Platform):** Built a Spring Boot backend managing 3,000+ concurrent registrations; configured automated AWS EC2 deployments and reverse proxies with Nginx, reducing manual server administration by 90%.
- AVYAKT 3.0 (Event API):** Developed the backend infrastructure and endpoints to support an Android application, seamlessly handling the data load for 1,200+ users onboarded within 3 days.

CERTIFICATIONS

Claude Code 101 (Tech Mahindra, Apr 2026)

Android Development (Avyakt 3.0, Oct 2023)

JAVA Certification (WIPRO, Apr 2024)

MuleSoft Certification (Aug 2023)
